EDUCATION

University of Waterloo

Computer Science, Bachelor of Mathematics (Co-op, 1B, 3.5/4.0 GPA)

Waterloo, ON

August 2025 – April 2030

EXPERIENCE

Software Developer Co-op

June 2026 – Present

SeedLift

Toronto, Ontario

- Refactored parts of the codebase with Claude Code and Codex to improve accessibility for the non-technical team
- Converted deterministic prompts into JavaScript and Python scripts, reducing token costs and improving efficiency
- Researched and applied GTM engineering processes and best practices to SeedLift's internal systems
- Maintained regular, continuous collaboration with employees across the company to gather input

Student Tutor

February 2025 – Present

StuTaught

Ontario

- Tutored grade 11 and 12 students in advanced functions, computer science, and data management
- Explained course content and provided further learning resources to tutees
- Worked in both Oakville and Waterloo

TECHNICAL SKILLS

Languages: JavaScript, Python, Racket, Rust, C/C++, HTML/CSS, Dart, SQL

Frameworks: Svelte, Node.js, Flutter, React/React Native, TailwindCSS

Developer Tools: Git, GitHub, Google Cloud Platform, Amazon Web Services, Postman, Figma

PROJECTS

Qration (Work in Progress) | *Svelte, GitHub, Python, Rust, PostgreSQL*

December 2025 – Present

- Developed a web application using the Svelte framework, using a Python FastAPI back-end
- Used TailwindCSS and TypeScript for the front-end for an easier development experience
- Created a Rust script to parse through XML files from RSS/Atom feeds for efficiency and speed (in progress)
- Integrated Supabase project with a PostgreSQL database to hold all user data (in progress)
- Hosted the front-end and back-end on Amazon Web Services (in progress)

DocTalk | *Svelte, GitHub, WebSocket, Postman*

December 2024

- Developed a web application in under 12 hours using the Svelte framework during the Hack The Ridge 2024
- Collaborated with team using GitHub and VSCode Live Share
- Used WebSocket functionality along with Postman for debugging to send messages between accounts
- Won Best Pitch Award at the hackathon

Resistor Decoder | *Svelte, JavaScript, HTML/CSS, Figma, Git*

August 2022 – September 2022

- Developed a web application using the Svelte framework to easily decode colours on resistors
- Used Figma to plan out UI/UX and hosted the website online with GitHub Pages
- Revamped after two years using knowledge gained from more experience with CSS

Lightning Bot | *TypeScript, SQLite, GCP, Bash*

June 2019 – May 2022

- Developed a Discord bot with the discord.js framework
- Used in 80+ servers and maintained for 3 years before shutdown
- Implemented 18 different commands for users to interface with, including a poll system and pagination features
- Used SQLite and Sequelize for the database system which held data for polls and other features
- Created a custom command handler and a Bash script to automatically send commands to the Discord API
- Hosted on a Debian Compute Engine on the Google Cloud Platform using pm2 to manage the process

CERTIFICATIONS

[PCAP-31-03] PCAP™

Python Certified Associate Programmer

August 2024

Python Developer
